Hello,

I am writing in opposition to CT instituting tolls in the state. Although, i am sure it looks like an easy revenue generating opportunity, I feel this should be used as a last resort, after tough spending cuts, and after efforts to bring businesses and increasing employment opportunities into the state, therefore increasing revenue via sales tax and the current income tax platforms.

I am vehemently opposed to tolling in general, the proposed toll on 684 in Greenwich will do nothing but start a toll war with NY.

The below bullets are other items related to tolls that I am not in favor with either:

- allows an unelected body of appointees to determine toll rates and increases
- Tolls on cars will be next.
- Lack of financials prior to roll out.
- Lack of details on how this will function in relation to the Special Transportation fund.

I will NOT vote for any legislator that votes for this tolling program. Please consider other items including spending and improving the business climate in the state.

Thanks for listening.

Respectfully submitted,

Bob Naughton
